WMGS

---

P 1: \$950, \$985! UGGHhh! I can NOT keep up with these heating and electric bills! This winter was AWFUL! And then it will be time to put the air conditioner on and the bills will just start all over again!

P 2: Did you consider calling Low-E? We had our house wrapped last fall and it made such a huge difference! It's like wrapping your home in a thermos bottle! Low-E's house wrap keeps our home warm in the winter, and cool in the summer! The Comfort and savings alone have us wishing we did it years ago! We just went to Low-E-NE. com and they got us started, it couldn't be easier!
